

# Small Quantities... Simple Solutions.

## Simple Pac:

*For our customers who generate small quantities of used Fluorescent bulbs, we have made it easy for you to comply with Federal and State requirements. Purchase a 4 foot or 8 foot box from our Simple Pac box program. As your bulbs burn out, just place them in our convenient storage box. When the box is full you just ship it back to us via FedEx. Upon receiving the box, we will properly dispose of the bulbs and mail you a "Certificate of Recycling" to prove you have properly discarded these bulbs.*
